

# Great Power Needs Great Security

All Your Mac Devices Extra Secured

## Don't Choose Between High Security or Advanced Features. Get Both.

Scalefusion UEM for macOS enables IT teams to secure and manage their Mac devices with easy enrollment, automated application installation, macOS specific restrictions and a wide range of security settings. Compromising is not on the table.

## Effortless Features, Effortlessly Powerful

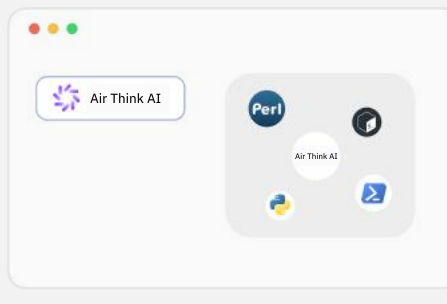

**OS Updates & Upgrades**

Identify and push patch fixes right from the Scalefusion dashboard. Choose instant updates or give users a grace period to apply them. Your OS updates on Cruise Control!

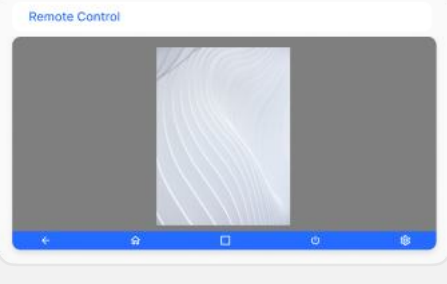

**Certificate Management**

Deploy digital certificates straight to all your Mac devices and manage them from the Scalefusion dashboard. Security in Every Byte.

**Dynamic Scripting & Script Scheduling With AirThink AI**

Create dynamic scripts with custom properties tailored to specific devices or users such as usernames, locations or shifts details. One Script to Run it All!

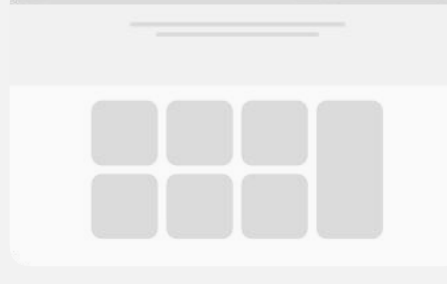

**Unattended Remote Control**

Allows your IT admins to gain access to the Mac devices without the end-user's presence and remotely troubleshoot them. Run IT tasks in silent mode.

**User Based Profile**

With User Based Profiles, you can share the same Mac device with multiple users by giving them individual profile identities, log-in credentials and tasks that won't coincide with each other.

**Web-Content Filtering**

IT Admins have more command over the browsing experience on macOS devices by controlling the access to websites and applying Safari's content-filtering algorithms. Happy & safe surfing.

## Micro Features, Maximum Impact

- ✓ FileVault Settings
- ✓ App Management
- ✓ Mac Pin Rotation
- ✓ Email & Exchange Settings
- ✓ Network Settings
- ✓ Gatekeepers Settings
- ✓ Reports & Workflows
- ✓ Dynamic Groups

## We Don't let Worlds Collide. We Let You Have the Best of Both.

**Bring Your Own Device**

The balance between work and life

BYOD allows your employees to use their personal MacBook and MacBook Pro's for work while meeting IT security and compliance. This protects company data without invading their personal apps, accounts or privacy

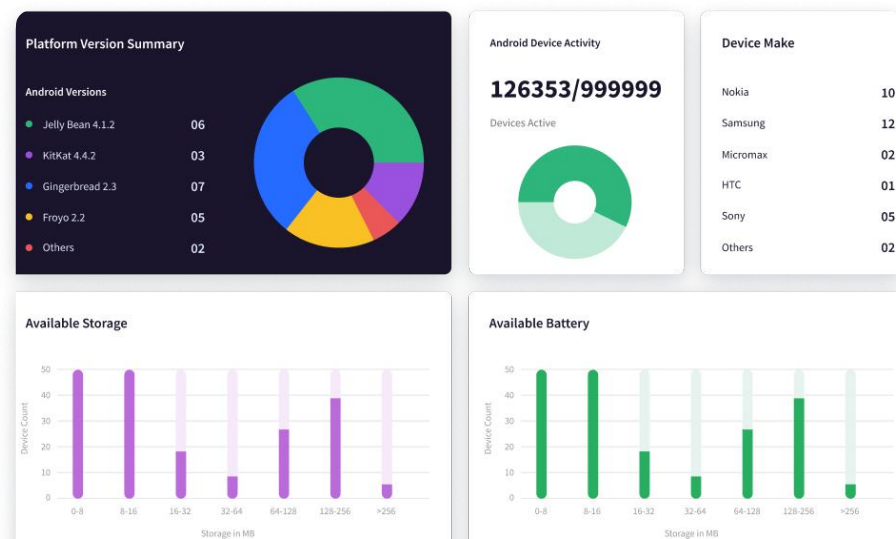

**Corporate Owned Device**

Company data stays within the company

COD deployments are ideal when you need to add an extra layer of security to macOS devices that are given to employees for work. This ensures they are not misused for personal purposes and protects critical corporate data.

## The Scalefusion Difference

**24X6 Free Chat Support**

Where you can reach out to our team, who will answer all your queries matter what time zone you're in. Our median response time stands at an average of less than 5 minutes.

**Smooth Migration & Setup**

We offer complete migration assistance to help you move from your current solution to Scalefusion MDM with confidence and ease. Just make the choice to migrate and leave the rest to us.

**Dashboard Designed For You**

We believe power comes from simplicity. Our clutter-free dashboard makes it extremely easy to manage your device's endpoints making day-to-day operations simple.

Don't Just Think. Experience the Difference.
